Volinga Suite

Advanced 3DGS Creation/Editing for Professional Workflows

Volinga Suite is the ultimate software solution for creating, editing, and preparing 3D Gaussian Splatting (3DGS) models for professional production workflows. Designed for flexibility and high-end results, it brings unmatched quality, compatibility, and ease of use to studios working with next-generation 3D capture.

Why Choose Volinga Suite?

- ✔ Professional-grade **ACES color workflow** support
- ✔ Compatible with **industry-standard** capture pipelines
- ✔ **Full control** over your 3DGS creation process with batch job management
- ✔ Integrated editing and publishing pipeline ready for **Unreal Engine**
- ✔ Built for **scalability**, **stability**, and **security** (offline options available)

Key Features

ACES Color Pipeline Support
Work with the industry-standard ACES color management workflow for perfect color fidelity across production stages.

Compatible with Reality Capture and Metashape
Seamlessly import data aligned with COLMAP from leading photogrammetry solutions like Reality Capture and Metashape.

Offline License Support
Activate and use Volinga Suite without requiring a constant internet connection, critical for secure environments and on-location work.

HDR and 16-bit Image Processing
Preserve full color and lighting details with HDR and 16-bit per channel processing throughout the pipeline.

Job Queue Manager
Batch process multiple jobs efficiently with Volinga's built-in queue manager — ideal for handling large-scale projects or multiple captures.

Integrated with Volinga Plugin for UE Features
All the playback and real-time capabilities from the plugin are included, ensuring consistency from creation to deployment.

Pricing

The Volinga Suite is available for the Enterprise and Studio subscriptions. Please contact our sales tea at: sales@volinga.ai or book a demo to learn more.
